

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving image, whereby the display is provided with an interchangeable item of information, wherein the display is secured to a frame by strut means.

Claim 2 (cancelled).

Claim 3 (previously presented): A mirror as set forth in claim 1 wherein the display is provided with a colored image representation.

Claim 4 (previously presented): A mirror as set forth in claim 1 wherein the display is a flat screen.

Claim 5 (previously presented): A mirror as set forth in claim 1 wherein the display employs one of TFT and plasmas technologies.

Claims 6-8 (cancelled).

Claim 9 (previously presented): A mirror as set forth in claim 1 wherein the display is connected to an input device.

Claim 10 (previously presented): A mirror as set forth in claim 9 wherein the input device is an external input device.

Claim 11 (previously presented): A mirror as set forth in claim 1 wherein the mirror surface is part of a mirror insert which is associated with a frame which forms a mirror interior.

Claim 12 (previously presented): A mirror as set forth in claim 1 wherein the mirror surface is part of a mirror attachment which is fitted onto a frame to form a mirror interior.

Claim 13 (previously presented): A mirror as set forth in claim 11 wherein the frame delimits the mirror interior and is connected to the mirror surface.

Claim 14 (previously presented): A mirror as set forth in claim 13 wherein the frame is composed of channel profile members having a width (b) which determines the depth of the mirror interior.

Claim 15 (currently amended): A mirror as set forth in claim ~~1~~
45 wherein the display is secured to a frame by strut means.

Claim 16 (currently amended): A mirror as set forth in claim ~~7~~
22 wherein the loudspeaker is associated with a perforated
region of a frame.

Claims 17-20 (cancelled).

Claim 21 (previously presented) A mirror comprises a reflective
surface, a non-reflective portion provided within the reflective
surface as an information provider, wherein at least a portion
of the mirror surface is transparent for seeing therethrough and
is backed by a display provided with a moving image, wherein the
display includes hologram.

Claim 22 (previously presented): A mirror comprises a reflective
surface, a non-reflective portion provided within the reflective
surface as an information provider, wherein at least a portion
of the mirror surface is transparent for seeing therethrough and
is backed by a display provided with a moving image, wherein
behind the mirror surface, at least one loudspeaker is connected
to the display.

Claim 23 (previously presented): A mirror comprises a reflective
surface, a non-reflective portion provided within the reflective
surface as an information provider, wherein at least a portion

of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving image, wherein behind the mirror surface, at least one loudspeaker is connected to an input device.

Claim 24 (previously presented): A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving image, including a radio receiver module for the image data.

Claims 25-44 (cancelled).

Claim 45 (new): A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving image, wherein the mirror surface is part of a mirror insert which is associated with a frame which forms a mirror interior, the frame delimits the mirror interior and is connected to the mirror surface, wherein the frame is composed of channel profile members having a width (b) which determines the depth of the mirror interior, whereby the display is provided with an interchangeable item of information.
